## **Customer Case :**

Amatal performs assessment with the customers of their requirements and challenges to migrating their in-house ERP application. Amatal created solutions to migrate their application to the Google Cloud Platform and helps them optimize and scale

## **Solution and Result :**

Amatal assist the customer to migrate in-house ERP web based application to Google Cloud Platform by setting up LAMP Stack configuration on Google Compute Engine, tuning their internal SQL database parameters, web server and perform domain propagation. Additionally, perform load testing of their application in GCP

The customer claimed that their application performance is significantly improved, more optimal when handling all of their outlets and could scale the application any time they wanted. Customer can also monitor their application utilization using Cloud Monitoring and Cloud Logging for better visibility. Customer can now utilize and integrate any Google Cloud Service to improve their own apps.

# Customer Testimonials

Central Mega Kencana has established its presence in the world of luxury as the biggest retail jewelry company in South East Asia. Central Mega Kencana added more distinctive collections of various gems as the company built more shining reputation in the luxury jewelry market
